## Profile

---

Aspiring DevOps Engineer with hands-on industrial training experience in Linux administration, Git workflows, containerization, cloud fundamentals, and CI/CD practices. Interested in building reliable deployment pipelines, automating infrastructure tasks, and improving system observability.

## Experience

---

- |  |  |
|--|--|
| <b>ZenSoft Lab</b><br><i>Industrial Trainee (DevOps &amp; Cloud)</i> | <b>Dhaka, Bangladesh</b><br><i>Nov 2025 – Dec 2025</i> |
|--|--|
- Worked in a DevOps learning and practice environment focusing on Linux, Git, Docker, AWS fundamentals, and deployment workflows.
  - Practiced version control (branching, tags, rollbacks) and secure access (SSH) for collaborative development.
  - Performed web deployment tasks using cPanel and handled basic server-side troubleshooting.
  - Explored cloud fundamentals and services (EC2, AWS CLI, CloudWatch monitoring, ELB, RDS basics).
  - Developed an understanding of monitoring, logging, and operational best practices for reliable systems.

## Education

---

- |  |   |
|--|---|
| <b>Green University of Bangladesh</b><br><i>B.Sc. in Computer Science &amp; Engineering</i><br>CGPA (current): 3.23/4.00   Expected Graduation: 2026 | <b>Dhaka, Bangladesh</b><br><i>2022 – Present</i> |
| <b>Amirjan College</b><br><i>Higher Secondary Certificate (HSC)</i><br>GPA: 4.17   | <b>Dhaka, Bangladesh</b><br><i>2019 – 2020</i>    |

## Technical Skills

---

**Operating Systems:** Linux (Ubuntu), Windows  
**DevOps & Cloud:** Git/GitHub, Docker (Basics), CI/CD Concepts, Monitoring Basics, cPanel Deployment, AWS (EC2, CLI, CloudWatch, ELB, RDS Basics)  
**Infrastructure Tools:** Terraform (Basics), Ansible (Basics)  
**Scripting:** Bash, Python (Basics)  
**Web:** HTML, CSS  
**Database:** MySQL, SQL

## Projects / Practical Work

---

**Linux & Git Practice Lab:** Worked with Linux commands, user permissions, file operations, process monitoring, and Git branching/tagging/rollback workflows.  
**cPanel Deployment Practice:** Deployed a web project using cPanel, configured settings, and validated deployment steps.

**AWS Fundamentals Practice:** Explored EC2 instance basics and AWS CLI usage; practiced monitoring with CloudWatch and reviewed load balancing and database basics (ELB, RDS).

**Monitoring & Reporting:** Practiced log-based checks and basic monitoring concepts to identify issues and improve stability.

## Languages

---

**Bangla:** Native / Fluent

**English:** Proficient

**German:** Basic
